

INFOGRAPHIC

Electronic Invoicing Compliance in Cambodia with SAP Document and Reporting Compliance

Cambodia's E-Invoicing Regulatory Landscape

The Timelines

Cambodia's e-invoicing **phased rollout**

25

Phase 1 — Launched

2025 — B2G Mandate begins

National CamInvoice platform launched. Business-to-Government transactions enter mandatory electronic invoicing under GDT and GDDE oversight.

26

Phase 2 — Active Now

March 2026 — Private sector expands

Selected private companies mandatory — based on size, industry, or risk profile. B2B e-invoicing obligations begin for the defined group.

27

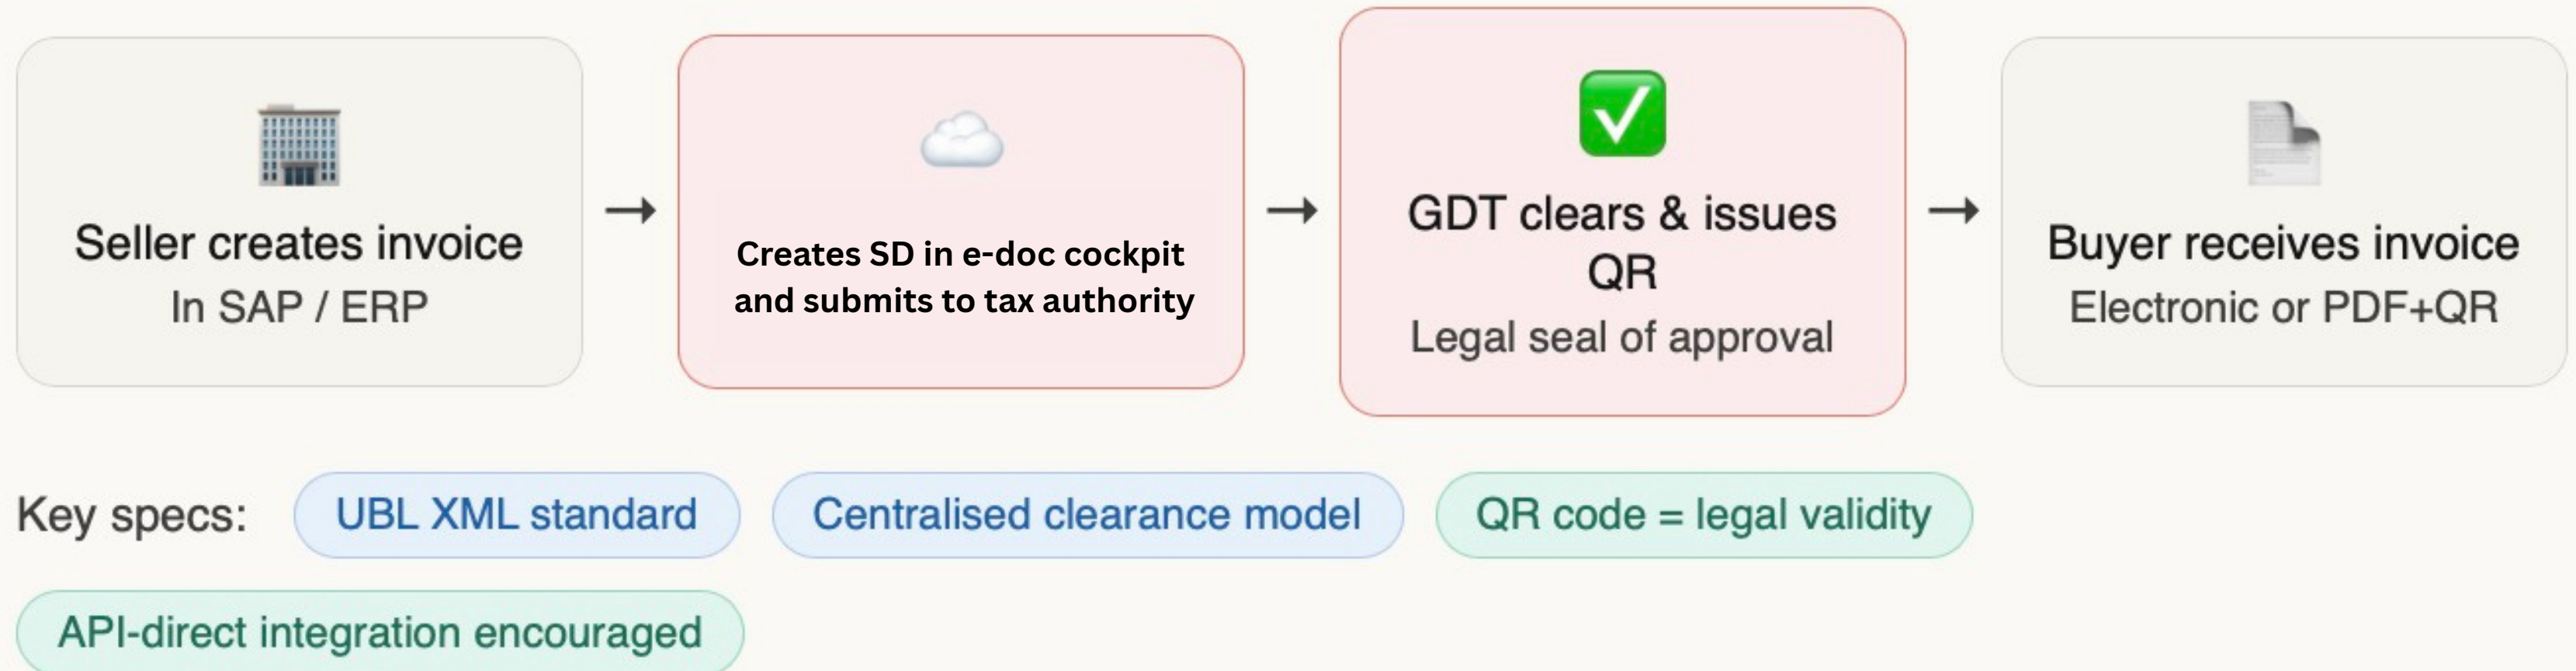

Phase 3 — Upcoming

2027 — Full implementation

All government entities and broader medium-to-large taxpayers required on CamInvoice. Full national adoption across all qualifying organisations.

The Working Model

How it **works** in real-time?

The Compliance

Crimson's **SAP-led** compliance solution

Compliant invoice generation

Direct from SAP Finance and SAP SD — structured data with consistent, tax-relevant fields ready for CamInvoice submission.

Controlled submission workflow

Manual or automated submission options aligned to Cambodia's evolving framework with monitoring and exception handling.

Audit-ready archiving

Structured electronic archiving with full traceability from SAP source documents to submitted and cleared invoices.

Reporting & reconciliation

Clear retrieval for VAT reporting cycles, dispute resolution, and tax audits — aligned to GDT transparency requirements.

Supported platforms:

SAP S/4HANA

SAP ECC

SAP Integration Suite

SAP Document & Reporting Compliance

The Value Proportion

Business value & retention requirements

Reduced audit & compliance risk through automated controls

Faster month-end and VAT reporting with fewer corrections

Lower operational cost via standardised, automated workflows

Invoice retention requirements (Cambodia)

10 years

Medium & large taxpayers

3 years

Small taxpayers

Secure archiving and rapid retrieval are non-negotiable for organisations facing GDT audit. Crimson's solution aligns storage to both tiers.
